

## Overview / Instructions

**1 Set the average anticipated inflation rate to predict future cost of projects:** 4%

**2 Enter the upcoming collective bargaining agreements and their anticipated year of Negotiation**

**3 Identify each project and complete all columns**

Building	Type	Project	Description	Compliance	Grant	Stand alone	Elem Plan	2021 Valuation
The specific building	Project grouping, e.g. "HVAC"	Short Name	1-2 Sentences	Does the project resolve a known compliance issue?	Is the project eligible for a known grant application?	Can the work be done as a standalone project without risk of re-work during the Elementary renovations?	Is the project part of the Elementary renovation bond?	Est. cost of the work if completed this year

**4 Debate/decide/recommend which warrant year to place each project**

Pretend as if there will not be an elementary renovation bond, and all projects must be assigned to a standalone warrant article

Enter a priority number and sort within each school building

1 = top priority

Two or more of the same priority number (e.g. [3] "fives") indicates a group of projects that need to be completed as one effort on the same warrant

## Principles of the Capital Improvement Plan

- 1** The exercise must be completed every year to maintain a healthy plan
  - 1.a** New projects will be added
  - 1.b** Planned projects will be combined
  - 1.c** Planned projects will be re-prioritized and then re-sequenced
  
- 2** The estimates are based on the knowledge available at the time
  - 2.a** Rounded estimates are based on professional knowledge or a single bid
  - 2.b** Site surveys and formal bidding have not been conducted
  - 2.c** Rounded estimates do not account for inflation
  - 2.d** Every rough estimate should be rounded up x% each year until the year of execution
  - 2.e** Rounded estimates are based on the current year's cost, and does not account for in
  
- 3** Sorting and Sequencing is standardized:
  - 3.a** Short-term before Long-Term
  - 3.b** Then, within each group:
    - 3.b.i** Safety/Compliance first
    - 3.b.ii** Energy/Efficiency second
    - 3.b.iii** Renovation/Cosmetics third
  - 3.c** Technical/Logical Requirements may trump all, e.g. sitework needs to be done before
